OUR VISION AND VALUES

Our vision and distinct set of values drive the success and spirit of our organization. At Degreez Global, we live our values. Our Vision and Values help us to make strategic decisions, allocate resources and focus our choices every day.

OUR VISION

We are dedicated to creating an enduring premier global enterprise built on a unique business culture that achieves success for our customers. This involves doing all things with **integrity**, **respect** and **candor** with a deep commitment to excellence to all stakeholders.

OUR VALUES

Customers Talk, We Listen - The voice of the customer will always drive the development of our strategic plans and actions. Living this value is done by getting customer Input and Expectations, at every opportunity and by differentiating ourselves in how we deliver to our customers.

The Best Team Wins – Team-oriented involved associates are our most valuable resource and we are passionate about attracting, developing and retaining the best talents. We do this in three primary ways: Building the right team, creating the right environment and getting the win.

Innovation Defines Our Future – Individual and organizational creativity drives breakthrough ideas for technology, products, solutions and processes. We achieve this value by creative thinking and by understanding what innovation brings.

INTRODUCTION

Degreez Global Resources Limited is a wholly owned Nigerian company.

As an indigenous company, we are fully committed to help alleviate Clients' downtime through assisting to delivering services at the nick of time through **NDT Services, Calibration Services, Rope Access and General Procurement.**

In our quest to delivering sustainable services, we are spreading our footprint nationwide, setting new benchmarks for operational efficiencies, investing in global resources and redefining paradigms.

Our focus on building lasting and trusting relationships with our customers, partners and employees, and our legacy of caring for our communities, remains the bedrock of our continued sustainability. We aim to energise consumer lifestyles by providing sustainable procurement services. Also, we aim to set higher benchmarks in terms of development standards, and in the implementation of cutting-edge eco-friendly technologies and processes of energy management.

RANGE OF SERVICES

1. NDT Services

Degreez Global provides a comprehensive range of inspection and non-destructive testing services for lifting appliances and structures across all industry sectors.

We offer integrated packages to suit specific requirements including full project management and technical capability, conventional base and site services, and a range of specialist and advanced methods that utilise new and developing technology.

Lifting equipment inspection is required every 6-12 months as per the Lifting Operations and Lifting Equipment Regulations 1998 (LOLER) or 5 yearly as required by manufacturer. Degreez Global has capabilities to provide these inspections and experienced project managers can also create the required examination schedules.

Inspection methods include:

- Thorough visual examination and function checks, measurement of wear
- Conventional NDT-Ultrasonic testing, Magnetic particle inspection, Eddy current, Dye penetrant Inspection
- Load Testing- we have capability to load test up to 400Ton
- Load moment Indicator verification

2. Calibration Services

Degreez Global has provided calibrations of the highest quality offering a wide range of factory and on-site calibration services.

All calibrations are traceable to the international system unit (SI) through a local national metrological institute (NMI).

Our services are designed to ensure that your testing systems meet and exceed relevant standards. Our calibration specialist are trained and supported by necessary calibration tools and standards to verify and calibrate all Degreez global materials testing systems.

3. Rope Access

Degreez Global technicians, with their IRATA seasoned qualifications, have specific working at height expertise and a full appreciation of drop object potential as part of their everyday jobs not forgetting the need of installation at height.

Rope access presents the added advantage of surveying difficult to reach areas, this is useful considering most drop objects originate from equipment or structures mounted at height.

Working at height

4. General Procurement
- Procurement of Load Cells
 - Procurement of DEMCO Valves
 - Procurement of Flanges and gaskets
 - Procurement of buildings and construction materials
 - General Marine Supply and Maintenance of Assets
 - Lifting appliances and lifting equipment
 - Procurement of NDT consumables

These range of services itemized above extend to the following:

Procurement of Load cells

We supply the major types of load cell either compressed or the tensile type our ranges of load cells ranges from 5 to 800Tons, even higher based on customers' request.

With the vast changing in Technology we tend to always update our clients of what is acceptable in the industry.

Lifting of 200Ton structure for Erha Project

Procurement of Valves

Valves are the most important part in an oilfield application, this application includes- pump manifold block valves, high pressure mud mixing lines, standpipe manifolds, high pressure drilling system block valves, wellheads, well treating and frac service, production manifolds, production gathering systems and production flow lines.

With these applications Degreez Global supplies in ANSI and API classes depending on the customers' specification.

We major in DEMCO likes of series DM ANSI/API, The ANSI series valves conform to the standard flange dimension and pressure requirements for ANSI classes 400, 600, 900 and 1500. The API series conform to the

standard flange and pressure requirements for API classes 2000, 3000 and 5000.

Procurement of Flanges and gaskets

In the industry clients are so specific of their flanges meeting up the API spec. In Degreez Global Resources meeting the national and international statutory requirement of Flanges and Gasket is our watch word.

Gaskets

Flanges

Supply of Marine paints

Corrosion is the main enemy of marine equipment or vessel, we supply all kinds of paints to customers' specification.

Supply of lifting appliances and gears

Safety is everybody's business, so we ensure to supplying standard lifting appliances like chain hoists, Tirfor, rachets and many more. Not leaving lifting gears behind like Shackles, lifting belts, webbing slings and chain slings.
