October 31, 2018

Dear Sir,

LETTER OF INTRODUCTION

Bisbal International Services Nig. Ltd. (BISN) is a fully owned Nigerian company. Incorporated and registered with the Nigerian Corporate Affairs Commission in accordance and compliance with the Companies and Allied Matters Act 1990 of the Federal Republic of Nigeria.

We started off with a major aim of providing services to solve environmental problems, improve standard of living and making huge reduction on high cost of service provision to customers across all divides as Bisbal Engineering Services (BES) in 2007 and in 2016 we saw the burning need to step up our game to become Bisbal International Services Nigeria Limited (BISN) to increase our service and solution provision capacity without limitations to our customers. The company has grown from a single business as engineering services provider to a multidisciplinary services provider. Since our take-off, we have been providing high quality services to our numerous customers with consistency. Bisbal's operations are currently spread over four Nigerian States with office in Lagos State. The other three operational offices that provide extended market coverage and efficient delivery of services are located at Ile-Ife in Osun State, Adikpo in Benue State and Port Harcourt in Rivers State. As an impetus for our future expansion drive, we had acquired four plots of land on Lagos Island, Ibeju-Lekki axis for the construction of permanent office complex of Bisbal International, its principal staff quarters, guest house and recreation centre. There is an ongoing plan to add to the number of existing plots of land at our permanent site for future growth of the company. Bisbal International Services Nigeria Limited is a growing company and we look forward to both national and international collaborations in the technical and business development areas of our core and general business services.

Our mission, objectives, vision and core values are well spelt out in our company corporate profile. In our company profile as well, we have taken time out to one-by-one list out areas and different specialized fields of our operations and we do hope this might further be of interest to you.

Our technical partners are renowned nationally and internationally and well-grounded in all areas of Civil Engineering Construction, Building Engineering Construction, Environmental Engineering, Environmental Control and Management, Dredging and Marine Engineering, etcetera. A selected project pictures and equipment/ machinery capacity of some of our partners such as **Nigerpet** and **HID Engineering Limited** had been displayed in our company profile for your perusal. The entire fleet of project and operational vehicle of our technical partner Nigerpet would be attached for you to go through.

BISBAL INTERNATIONAL SERVICES NIGERIA LTD.

CIVIL & BUILDING CONSTRUCTION, DREDGING, EARTHMOVING & ENVIRONMENTAL ENGINEERING

We always assure our clients of our good quality and timely job delivery at all times. We therefore implore the procurement department of Living Faith Church Ota, Ogun State, Nigeria to try our technical expertise and capability in rendering quality services to its office.

We expect to hear from you in no distant date and thanks for your anticipated patronage.

Yours faithfully,

For: Bisbal International Services Nig. Limited

Engr. Tunde Oladipo
(MD/CEO Bisbal International Services Nig. Ltd.)
