Who We Are

RETEA-NOVA is a solution based entity that best finds the heart of its customers' hearts by providing answers to all their questions. It is a forward thinking company driven by 2 Master's Degree Covenant University graduates, who have imbibed the company's core values from being students at the University, and from a strong followership of the very business savvy Dr David Oyedepo.

Our Core Values for which everything we operate and stand on are;

- i. Accountability*
- ii. Integrity*
- iii. Transparency*
- iv. Possibility Mentality*

We are an ever-growing company with our tentacles in Information Technology and Housing due to the combined years of experience of the co-founders and the company's partners.

What We Do

At **RETEA-NOVA**, we operate a double-edged solution entity with our reach in Information Technology and Housing. Listed below are the services we render at the company;

A. INFORMATION TECHNOLOGY - ReteaTech™

- a. Supply and Installation of Biometric Time Attendance and Access Control Systems and other bespoke human or goods monitoring systems.
- b. Supply of all Mobile and/or Computer-related products, solutions and systems.
- c. Design and Development of Software and Mobile or Web-based Applications, with an on-going development of a Electricity Mobile Solution for Power Holding Corporation of Nigeria (PHCN).

B. HOUSING - ReteArch™

- a. Design, construction and total supervision of structural projects.
- b. Supply and installation of building related products.

The company also has other muse-businesses that can be categorized under a Lifestyle sector. These businesses include;

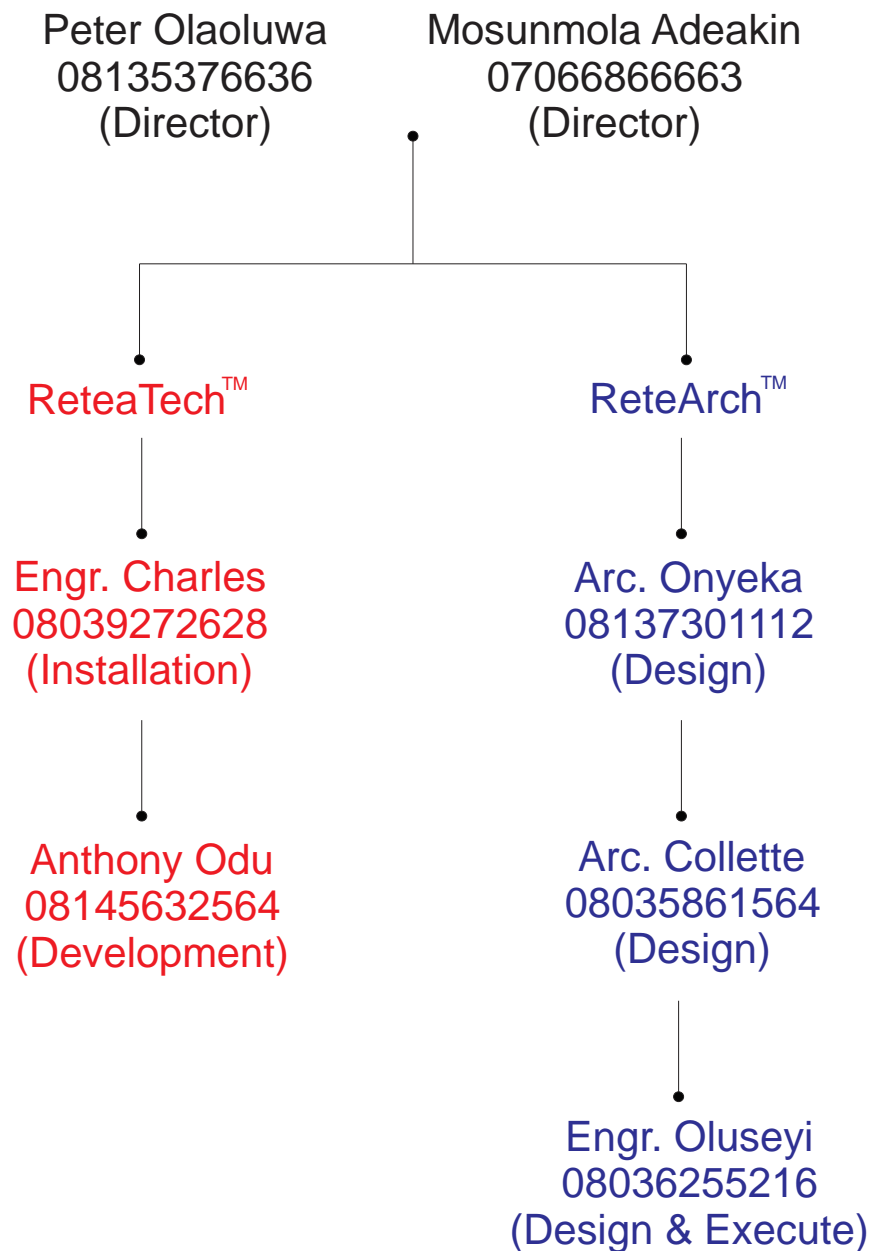

- a. **SmatInvite**, which is simply an event-centric Security System where Biometric Solutions is used to cater to 'strictly-by-invitation' events like weddings, conferences, parties etc.
- b. The company is also breeding a fashion brand which is to be called **Eleven-22**. This is a platform focused on bringing Nigerian Fashion into the global sectors with budding Sales Point to be located in Canada, United Kingdom and United States.
- c. Also in the works is the bringing to life of a Food and Agricultural Sector which will deal in sales of finished and raw food items across the country.

Our main objective as received in the final year of our Directors' Bachelor's Degree in Covenant University are;

- ❖ *To Teach the World through a re-orientation of what is perceived as a way of doing business through an array of Godly-business traits injected into our methods.*
- ❖ *To Feed the World through quality standard of food product and also by reaching out to the needy here on earth, beginning from Nigeria.*
- ❖ *To Fly the World by taking to the skies with home-made products and transport them all over the world.*

Company Layout

We have been privileged to have the best and most forward-thinking minds working with us at RETEA-NOVA and here is a layout of our team:

FOR COMPLAINTS/ENQUIRY: +234 813 537 6636, +234 706 686 6663 /

ptrolaoluwa@gmail.com or adeakinmosunmola@gmail.com

We also work with the best manufacturers and suppliers across the globe to ensure we meet the demands laid on us by our customers. With International relationships in India, China and Canada, we are a growing force in the Information Technology sector.

Conclusion

RETEA-NOVA has been privileged to work on and with some of the best clients in Nigeria and here are some of them;

❖ **COVENANT UNIVERSITY, OTA**

This project involved the supply and installation of a total of 39 Biometric Solutions in 2015. These devices are currently being used by the University staff of about 2,000. The authentication used is the RFID Card method.

It is a solution which has its devices placed at strategic locations across the University and reports are collected and extracted into their Records office for Report Generation purposes.

There is an on-going proposal for the adoption of the solution for the entire student capacity of the university.

❖ **LIVING FAITH CHURCH, CANAANLAND STAFF.**

This is the supply and integration of an initial 5 Units of Biometric devices and another newly placed order for 2 extra devices for the daily use of their staff at devotions and general meetings. This solution caters to about 1,000 users.

This is a mobile Biometric solution that uses 2 authentication methods, RFID Cards and Fingerprint. A third authentication could be used however, but they desired to use only two methods.

We are also privileged to have been contacted by the Landmark University for the total development and installation of our Biometric solutions for both their Staff and Students. We are also privileged to have developed several Mobile Applications but due to Client-Customer Confidentiality, we cannot disclose their details here.

These are some of the major projects we have been privileged to carry out on the Biometric Solution platform.

It is one thing to get a solution from a vendor, it is another thing to get a perfect one that best suits the needs or demands from a vendor who best understands a comfortable 'After-Sales Relationship' such that the client will enjoy the use of the solution – this is what we do here at **RETEA-NOVA**.
