3

STRATEGY

The management is determined to continue uncompromising realignment of the company to suit changing market and customer needs. That is why the company will continue to appoint capable hands into key Executives positions. This strategy is designed to achieve a market increase. In the last few years, the substantive impact of this strategy has been felt through all levels of the organisation. At the same time, great premium has been placed on specific training and development programmes for members of staff.

With successful implementation of key strategic goals, the company hopes to build very effectively on the existing foundation in order to concretize the company's plans to become the leading provider of logistics supports in the computer sector.
