COMPANY PROFILE:

PIROOSKY NETWORKS SYSTEMS is a IT / Network Technician functions actively on the market since 2016. During 2year activity we developed from a small, unknown firm into a company, that is a leader on the market of telecommunication enterprises

We render our services each day to companies located most of all in office blocks and shopping centres. Each our client is handled individually; we prepare an offer specially tailored to his needs and expectations. Apart from the basic array of services we are ready to satisfy even the most specific expectations/wishes of our clients.

The main area of the company's activity is providing comprehensive telecommunication and IT solutions first of all in office blocks and commercial buildings. We base our services on modern technologies and systems of the leading manufacturers. We don't limit ourselves to provide the service, but we also support our Clients from the beginning and through the whole activity time – we help to solve problems and explain telecommunication and IT issues.

We also offer general supplies of any kind of items your company will want as we are trying widen our scope of business.

SERVICE - The service must complement quality. Only by understanding the needs of its customers the company can provide high quality services and maintain its leading position on the market.

EFFICIENCY – The Company believes that the best way to improve productivity is to provide its people with the opportunity to learn and improve their personal skills, contribute to the work process and be satisfied with their achievements
