FUNMETRIC TECHNOLOGIES LIMITED
RC: 959047

PROFILE

We help to identify and deliver solutions that improve Security and IT efficiencies and reduce downtime.

Executive Summary

Funmetric is a team of expert and experienced. We are set to deliver proactive services and even exceed the expectation of the clients, when it comes to General Services (such as Office Equipment and stationery/consumable items), security and IT project design, implementation and Service Level Agreement (SLA). We have robust technical support strategies as following:

Project implementation

The process for implementing project at your facilities requires very limited time on your part. The first phase of project implementation involves working directly with your management team to determine how propose project equipment best suits your needs. Our specialists will evaluate your current system posture, reporting systems, emergency response procedures, and other aspects of your overall facility management plan. During the final phases of project implementation, our team will prepare customized training materials for distribution to the users you identify. Those training materials will also reside on-line so new personnel in your organization can quickly become familiar with the current system.

Level of system complexity continues to rise

As technology continues to evolve, your system provides you with even greater functionality and advanced feature capability. However, as the level of sophistication grows, system support becomes more complex. Maintaining peak system performance and availability requires a dedicated team of expert technical support who can ensure rapid response and resolution to any system issue. Funmetric technical support team help solve even the most challenging system issues.

Layered support every time you need it

Funmetric Technical Support Service provides an additional layer of support through centralized, telephone consultation for technical issues that require a high level of system network expertise and troubleshooting capabilities. Support is just a phone call away and ensures that any client issue is professionally and consistently handled in the shortest possible time frame.

Value proposition

Available when you need it: Highly trained Funmetric team provide expert technical support whenever you need it, 24x7x365 (or 8x5 depending on contract).

State-of-the-art resources: The Funmetric team uses test systems for in-house laboratory simulations that can duplicate your issue, as well as access to a continuously updated knowledge database of common issues and solutions to speed resolution.

Rapid and consistent resolution: Expert resources, sophisticated tools, defined severity levels and proven case management methodology ensures rapid response and resolution.

Service level commitment: Support provided to an agreed service level as opposed to a best effort basis. But we have created a comprehensive portfolio of service offerings and choices that provide the exact level of support that fits your unique business, including hardware, software repair & return, field support, security systems management and so much more.

You are welcome to the world of Funmetric Technologies Limited, where RESULTS matters.

House of Worship Solutions

Whether your system requirements are generated by day-to-day operations, specific business needs or outside regulations and requirements, they must all be taken into account when designing a system. We know there is more to your investment than equipments — understanding the environment where the solution will be used is crucial to ensuring that it has the capability to meet end user needs.

Maintaining an open environment and welcoming atmosphere within the constraints of today's budgets is a challenge for every religious institution. From the smallest chapels to the largest multi-site worship centers, Funmetric offers integrated solutions that help you meet the challenge— providing peace of mind while also protecting your facilities against incidents that disrupt worship.

Banking Solutions

A financial institution's reputation and success are based on how well it proves to customers that it can effectively protect their hard-earned assets and investments. Funmetric's solutions are designed to provide security — and instill customer confidence — at every level. Our trusted experience, combined with the quality and reliability of our integrated security systems, help banking customers to meet their existing and emerging security challenges.
Airport & Seaport Solutions

As a cornerstone of the global economy, seaports & airport transport goods swiftly and efficiently—but it places them high on the list of potential targets. The need for heightened security should be balanced with the need for fast throughput. With threat levels ranging from common vandalism to domestic terrorism, the security of our seaport & airports is paramount. Funmetric continually making research in emerging technologies such as facial recognition to provide an integrated solution that can enhance perimeter protection as well as internal security.
